Director (Plg.) MPR/TC,
D.D.A. Vikas Minar N. DELHI-2
Dy.No. 2226
Dated 30/4/12

To arrest fall in Ground Water Level, the Master Plan should include ambitious scheme for water harvesting. Rain Water harvesting in Group Housing Societies, old and new, should be made mandatory. Similarly Rain Water harvesting in Govt. , both Central and Delhi, owned properties and land should be made mandatory and adequate funds be provided. Water storing ponds be dug in all public parks, existing as well as parks which will be developed in future. Criteria be laid for percentage of park land to be converted in such Water storing ponds. Rain water from near/ surrounding roads to the park be diverted to these Water storing ponds. this will increase Ground water level. A tracking path way can be built around the Water storing ponds, this will be good for morning walkers. This system is working successfully in Ahmadabad. These proposals shall be debated, guidelines be framed and implemented. Thanks.
