Respected Sir ,

This is to bring to your kind notice - the amount of build up space we are waisting in prime area of New Delhi , especially in Commercial area like Cannought Place and neighborhood. Of course you would have got lot of letters and messages - and all are important as all related to Delhites , and all need your attention and kindness for proper consideration and implication.

Certain suggestions for proper use of BASEMENTS , especially in commercial areas - already built constructions going a waste !

In foriegn countries , *people live in basements* - here we are not allowed to have offices in basements - for threat of fire , which may happen due to wrong functioning of any AC of parked vehicle . / some carelessness / short circuiting etc.

Multistorey Buildings came up in Cannought Place and neighbourhood in about 1960s , then trucks etc. were allowed in the area and it was comfortable for people to *use BASEMENTS as Stores* - *NOW - in times of COMPUTERS* - and heavy traffic not being allowed in areas like Cannought Place , why don't to permit use of BASEMENTS as offices / shops etc. *as already done
