Suggestion	<p>The para talks of development of parking facilities either by traders association or local bodies and may include public private partnership as model for implementation. The following places indicated in the plans are potential places where market specific parking can be provided. Some of these are MCD schools which can be rebuilt with double level parking spaces underneath in the basement. This kind of parking project is already being built by the MCD in some areas. This will completely solve the problem of parking in the special area of Karol Bagh. Thanx & Regards, Neeraj Gupta</p>
