**Subject: Recommendations to save heavy destruction at Village Masoodpur.**

Dear Sir,

The proposed 75 Mtrs road in master plan for Mehrauli -Mahipalpur road is going to create a lot of destruction for Masoodpur Village. Presently the road width is 82.5 feet with high built up on both the sides. The below mentioned options have been drafted to save this mass scale destruction and save livelihood and roof of thousands of people.

**Recommendation**

**Option 1:**

Connect existing 30 feet road (Shown in Map as Annexure A) to proposed 60 Mts road (Nelson Mandela Road), which further connects to proposed 100 Mts Road from N.H 8 to MG Road. This will create a bypass for Masoodpur village and save mass destruction. The existing 30 feet road can also be widened as it lies in green belt.

**Option 2:**

One way Flyover on Masoodpur stretch, which has also been proposed earlier by the DDA committee. The DDA committee had proposed to construct a 700 m long 3-lane single carriageway flyover (road over road) between existing flyover at Nelson Mandela Marg flyover and Main Masoodpur Village (Annexure B). This will also be helpful in giving a meaning to existing flyover, which at the moment is not giving any benefit. I would like to bring to your kind attention that there are flyover's which are running well and are even less than width of 80 fts e.g Palam Flyover, Barapulla flyover etc.

I would therefore request the concerned authority to look into the options seriously, as it will save heavy destruction at village Masoodpur and save livelihood and roof of thousands of people.

Your's faithfully

  
Rupender Malik
