SUBJECT- Request for permission of commercial activity on a notified commercial road.

Sir,

I have a question to make as I am still to come to terms with the kind of sealing drive the government ran in this city which has made everyone from a shopkeeper to a worker to a wholesaler unhappy and unsatisfied with the government. The basic necessities and ground realities of people and areas have been totally ignored and stepped on respectively.

Here in question is the total stretch of 2 km in kotla Mubarakpur named Gurudwara road. I including all my customers who have been visiting me all these years have been shocked and kind of amused at the disparity shown in this area as one side of the stretch is allowed to work on all the floors except c-1 to c-8, b-1 and n-14 which can only carry out commercial activity on ground floor and basement and they have been given this step motherly treatment citing difference in the house tax rules. According to the new and funny master plan we people are supposed to live in a area with our families where commercial chaos is always on and the place is not at all fit for habitation.

Thereby I request you to kindly make the necessary amendments and let people work in a area which is only fit to carry out commercial activities and not to be used as residential purposes.

Thanking you

Yours faithfully,

Mayank Doyal
