Sub: Suggestions for P-1 Narela in reference to your Public Notice in the News Paper.

Sir,

I am resident of Narela. In the interest of residents of Narela, I thank you that you have invited suggestion on 'FUTURE OF DELHI-2021' but your invitation is misleading, cheating, eye-wash and fraud because you have not executed your past works due to your co-ordination & relation-ship is very poor with other authorities like MCD, DJB, Transport, SDM etc. The following some of works are still pending & executed in Narela.

1. The road/ street connectivity was not done with MCD,s road/street.
2. The infrastructure is very in residential pockets such as in our pocket water pump has been not working from last five year.
3. The sport clubs and community centers are not functional. As per your department, the architect is not completed after lapse of many years.
4. The street lights were not installed on many roads/streets.
5. The kiosks and shops are not allotted to necessary service provider like barbers, vegetable sellers etc.
6. Your department has well learned peoples but intentions are not in the interest of residents.

My some suggestions are as follows:

1. First of all, you complete all pending civic amenities and time bounded
2. The co-ordination and relationship must be good with other govt. authorities.
3. The transport facility must be good so please make a bridge over Yamuna River in the east of Narela, Metro and asked railway to construct proposed Holambi Terminal.
4. You must allot Commercial plot to Govt. Authorities, institutions, corporate etc which will create a lot of jobs.
5. All works must be completed timely.

I hope you will consider complains & suggestions positively.

Thanking you,

Yours truly,

Rajesh Sonthalia
