Subject: elimination of waste from yamuna not by using energy but by producing it.

Sir,
our team had made a project which will not only clear the waste(sludge,heavy metals) from yamuna and also in return we will get useful products(biodiesel,pure drinking water,bio-gas,food supplements,glycerine,manure)and it will definitely clear yamuna and it is a pure ecological way as in this we are using microorganism. And it will not only clear Yamuna but will also reduce the carbon foot print.And as whole project could not be explained here so please, if you are interested you can contact us.

Thank You,
