Activity Centre: Senior Citizen Recreation Centre, U&V
(Above Election Commission Office) Shalimar Bagh Delhi-88

Date-28 May 2012

To,
Hon. Shri Kapil Sibal
Member Parliament
Minister of Human Resources
Delhi

Respected sir,

SUBJECT: Amendments required in Master Plan 2021.

Respectfully we the residence of Shalimar Bagh wants to bring to your kind notice the following amendments required to be incorporated in the Master Plan 2021. These amendments if incorporated in the Master Plan of Delhi will make the life of Delhites more comfortably.

1. You will observe the private vehicle population is increasing with the rise in living standards of people. DDA colonies were designed not keeping in view these changes and therefore there is hardly sufficient place to park the motor cars and due to which there is hard words exchange between the residents everyday. In DDA colonies there are many small and big parks which are hardly maintained as MCD do not have sufficient gardening staff. These parks are usually used as dumping yards for garbage and therefore colonies look very ugly. We therefore propose that some of these parks could be converted into parking lots.
2. Shalimar Bagh under your constituency has large population of rich, middle class and poor but there is no government hospital. One has to depend upon 5-Star Private Hospitals which are recently started in our area. You will yourself observe how many people can afford treatment in these lavish Hospitals and therefore have to depend upon Government Hospitals located far away from Shalimar Bagh and more over these hospitals are already overcrowded. We therefore request you to get one government hospital incorporated in the Master Plan 2021 for Shalimar Bagh.
3. During your routine round of our area you must have observed that Ring Road around Prembari Pul is over congested and moreover the people residing in near by colonies have to take a long route to go to outer Ring Road. This route is already over crowded due to heavy vehicles. From Prembari Pul the western Yamuna canal flows and there is large vacant land along this canal which is at present misused by rowdy elements. This vast vacant land can be very easily

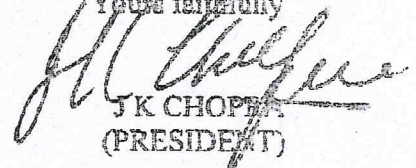

used to erect a fine road up to Haiderpur Plant which will decongest the traffic on Ring Road and make an alternate access to Outer Ring Road from Inner Ring Road.

4. We also bring to your kind notice that there are large population of jhuggi clusters in Delhi the all efforts by the government to resettle them has failed. Moreover as per the orders of court now these people have to be resettled by constructing multi storey buildings there itself. Since it is a long time consuming process and therefore jhuggi clusters will remain there for many more years to come. We therefore propose till these people are resettled civic facilities like latrine, etc should be provided so that people living around these clusters do not see the ugly sites and these places should be kept little clean. There should not be unhygienic garbage around these colonies.

We hope you will appreciate our suggestions to be incorporated in Master Plan 2021 and give your recommendations to the body accordingly.

Thanking you

Yours faithfully

J.K. CHOPRA
(PRESIDENT)
